CRITICAL VERIFICATION FOCUS: THE 80.00% GRADUATE PASSING THRESHOLD (VS. 76% UNDERGRADUATE ERROR)

A recurring error in automated drafts and generic nursing templates is the insertion of **76%** as the passing cutoff. In undergraduate and associate nursing programs (ADN/BSN), 76% or 75% is often designated as a passing "C/C+". However, in the **Herzing University Master of Science in Nursing – Direct Entry (MSN-DE)** graduate program, the academic standard is strictly **80.00% (Grade B)**.

Status in your Master Documents: Audited and verified. The erroneous 76% figure has been completely excluded from all your meta-analysis documents. The record properly documents that Canvas Mobile confirmed your true earned grade at **87.04% (B)** in NSG 523, which was artificially deflated to **73.35%** when the institution zeroed coursework and weighted high-stakes exams at 80.00%, manufacturing a failing grade below the mandatory **80.00%** cutoff.
